PROFILE

Results-driven **UI/UX Designer** with a Computer Science degree and hands-on experience designing mobile and web products. Skilled in user research, wireframing, prototyping, usability testing, and scalable design systems. Combines analytical problem-solving with user-centered design to create intuitive digital experiences that improve engagement, retention, and conversion. Experienced collaborating in fast-paced training programs and cross-functional environments using Figma and modern design workflows.

INTERNSHIPS

Intensive Training Program (ITP)

01/2026 – 05/2026

UI/UX Design track, Information Technology Institute (ITI), Menofia branch.

Menofia

Projects:

- **Vibelt - Outdoor Activity App:** a sports community platform that connects users with activities, certified coaches, nearby venues, and events to stay active and engaged. [Behance Link](#) 🔗
- **HAWY - Sports Performance Analytics Platform:** an AI-powered sports performance analysis platform for football clubs that integrates video, data, and insights into one scalable workspace. [Behance Link](#) 🔗
- **MatchPoint - Courts Booking App:** A sports court booking platform designed to simplify reservations for young players by providing easy access to available venues, clear schedules, and a seamless booking experience. [Behance Link](#) 🔗
